Students explore careers in science

A GROUP of Year 10 students are taking advantage of a unique opportunity to explore careers in science.

More than 20 Year 10 students from local high schools across the North-West coast are attending a science camp at Ulverstone.

The camp is designed to link students with the science industry and career pathways.

The camp offers a chance for students to experience a range of industry, research and professional science careers and workplaces.

UTAS School of Agricultural Science Education Officer Paul O'Halloran said the group will visit local industries and have the opportunity to talk to local researchers and scientists.

The camp runs from Wednesday, May 23 until Friday, May 25.

The camp is being held at Camp Clayton, Ulverstone and is a project co-ordinated by the *Skilling the Cradle Coast for the Twenty-First Century* program, hosted by the UTAS School of Agricultural Science.
