Engineering a great career

Engineering Week is being celebrated at the University of Tasmania with an information session at the Cradle Coast Campus highlighting the great career opportunities available to engineering graduates.

Engineering Australia has organised the event which will include information from university students, lecturers and private sector engineers about their pathways and work experiences in the world of mechanical, electrical, maritime and civil/structural engineering.

University of Tasmania Industry and Development Officer Dayna Broun said the Engineering Week event is a great opportunity for anyone considering study and career options.

“Engineers make a significant contribution to society, and we want to showcase that to as many people as possible,” Ms Broun said.

“This is a great opportunity to bring your family and friends along to find out what engineering really involves, how you can become an engineer, and where a career in engineering can take you.”

Ms Broun will be available at the event to provide information on engineering course options through the University of Tasmania.

Speakers at the event include:

Rowan Sharman – Civil Engineer and North-West Committee member, Engineers Australia
Mark Symes – Naval Architect and Course Coordinator, Australian Maritime College
Emma Cumming – Electrical Engineer/Systems Innovator, Burnie City Council
Matt Dewey – Civil and Structural Engineer, Tasmanian Consulting Service

Event Details:

When: Wednesday August 6, 4.30 pm – 6.30 pm

Where: University of Tasmania Cradle Coast Campus, Mooreville Road Burnie.
