

MEDIA RELEASE

NEWS FROM THE UNIVERSITY OF TASMANIA

DATE: THURSDAY 30 AUGUST 2012

ATTENTION: Chiefs of Staff, News Directors

A taste of blood, bugs, fitness and food

The UTAS School of Human Life Sciences at Newnham will host students from around Tasmania as part of the annual 'Taster Day' **tomorrow (Friday 31 August 2012)**.

Students from around the State who have successfully applied for a place in the event will participate in interactive workshops relating to the five undergraduate degrees offered by the School.

Workshops include exercise science, environmental health, health and nutrition, medical radiation science, cell biology and biomedical science.

Sue Musgrave, School of Human Life Sciences, said the workshops are designed to give students practical experience together with information on which to base future study and career decisions.

"The workshops are very hands-on and will be led by our great team of academics," Ms Musgrave said.

"It will also be a great opportunity for students to find out more about the range of health science degrees offered in the North and to see the excellent facilities we have within the School of Human Life Sciences."

Media Opportunity:

The media is invited to see the students take part in a range of fun workshops at 11am on Friday, August 31, at the Newnham campus.
